Installation and setup

Prerequisites

Before you begin, ensure you have the following installed:

- **Node.js**: v12.x or higher (recommended v14.x or v16.x)
- **npm**: v6.x or higher (comes with Node.js)
- **Angular CLI**: v12.2.2

```
npm install -g @angular/cli@12.2.2
```

Installation & Setup

1. Clone the Repository

```
git clone https://github.com/ondeliveroper/on-market-landing.git
cd on-market-landing
```

2. Install Dependencies

```
npm install
```

3. Environment Configuration

The application uses environment files located in `src/environments/`:

- `environment.ts` - Development environment
- `environment.prod.ts` - Production environment

4. Start Development Server

```
npm start
# or for Windows
npm run startWindows
```

The application will be available at `http://localhost:4200/`

Note: The start script uses `NODE_OPTIONS='--openssl-legacy-provider'` due to OpenSSL compatibility with Angular 12.
