API Specification

Company - Module

Endpoint

Endpoint	Method	Authentication
/module/company/list		

Authentication

Type	Token source	Server

Param request

Properties	Required	Description
company_id	yes	Company ID in SYNCHRONN

> Param request can be changed or disabled.

Result example

> 200 OK

```
{
   "module_list": [
      {
         "module_id": 1,
         "name": "Transaction",
         "group": null,
```

```
            "created_at": "2024-01-18T03:31:52.006Z",
            "updated_at": "2024-01-18T03:31:52.006Z"
        },
        {
            "module_id": 2,
            "name": "HRIS",
            "group": null,
